linkedin.com/in/battula-teja-swaroop | github.com/teja-13

Professional Summary

B.Tech Computer Science student graduating in 2027, focused on building backend applications using Java and Spring Boot. Built and deployed a full-stack expense platform with 9 REST controllers, Spring Security, and JWT refresh-token rotation, along with backend APIs for a role-based library management system with approximately 20 endpoints. Solved 249 problems on LeetCode and 666 problems on CodeChef.

Education

Vasireddy Venkatadri Institute of Technology 2023 – 2027
B.Tech in Computer Science and Engineering CGPA: 7.92/10

Loyola Public School, Guntur 2021 – 2023
ISC Class XII 79.6%

Loyola Public School, Guntur 2020 – 2021
ICSE Class X 90.16%

Technical Skills

Languages: Java, SQL, Python, JavaScript, C
Backend: Spring Boot, Spring Security, Spring Data JPA, Hibernate, REST APIs, JWT
Databases: MySQL, MongoDB Atlas
Frontend: HTML, CSS, JavaScript, React.js, Tailwind CSS
Tools: Git, GitHub, Postman, Render, Vercel
Fundamentals: Data Structures and Algorithms, Object-Oriented Programming

Projects

Expense Tracker `github.com/teja-13/spring-app`
Spring Boot, Spring Security, React.js, MongoDB Atlas | Solo Project

- Built and deployed a full-stack expense tracking platform using React.js, Spring Boot, and MongoDB Atlas, with 9 REST controllers covering authentication, transactions, budgets, categories, and analytics.
- Secured APIs using Spring Security and JWT authentication with refresh-token rotation; implemented OTP-based password reset through a dedicated email service.
- Developed scheduled budget alerts using Spring Scheduler and aggregation APIs for monthly spending trends and category-wise expense breakdowns.
- Deployed the frontend on Vercel, backend on Render, and database on MongoDB Atlas.

Smart Library Management System `github.com/teja-13/e2e`
Node.js, Express.js, MongoDB, React.js | Team of 4

- Developed approximately 20 backend REST API endpoints for a role-based library management platform supporting admin, librarian, and student roles.
- Implemented a signup approval workflow that places new registrations in a pending queue for admin review before account activation.
- Built book borrowing, returning, and reservation workflows with copy-availability tracking, automated overdue-fine calculation, and overdue notifications.

Achievements

- **LeetCode:** Solved 249 problems; contest rating: 1460.
- **CodeChef:** Solved 666 problems; highest rating: 1449; earned the Problem Solver Gold Badge and participated in 19 contests.
- **Quantathon 2026:** Advanced through 3 competitive selection stages, progressing from 1,800+ applicants to the final 120 selected teams.

Certifications

- AWS Academy Graduate – Cloud Foundations
- Introduction to MongoDB
